Awareness is conducted by Mr.B.Bhanu Prakash. He guided the students to attend the interviews. He also explained MBA Placement, Interview tips. Total 45 students are participated in this programme.

**MBA Job Interview Tips**

- **Research about the Company well:** When you select a company to appear for their interview, make sure that you are aware of the job role being offered to you. You should be well informed about the background of the company and its history, newly launched products or services, their target group and aspects. You should be well versed in the facts related to the organization as the interviewer might also question you about the reason behind joining the company and your awareness level towards the prospective job opportunity.
- **Find out about the Salary Structure:** You must research thoroughly the placement packages which are offered to the post-graduate fresher (s). This would give you an idea about the salary trends in various industries. The recruiters usually declare the expected band of salary that you will be entitled to receive during the campus interview. But in case the recruiters do not mention the salary band in advance then do work on researching the trends of salary in the current industry for the respective profile you are opting for.
- **Organize your Resume:** Your resume exhibits the first impression of your personality on the recruiter. Your resume should reflect the pool of talent and strengths which can help you work for the growth of the organization. The resume should highlight your experience (if any), strengths, undertaken projects or internships, and personal details. The structure of the resume should be well organized and appealing to the recruiter.
